LEGACY

PLATINUM™

SYSTEM

MAINTENANCE FREE POWER

from DOUGLAS BATTERY

# THE LATEST IN MAINTENANCE FREE TECHNOLOGY...

## LEGACY PLATINUM™ SYSTEM

The Legacy Platinum System from Douglas Battery offers the ultimate in maintenance free power. This valve-regulated system is designed and manufactured to provide long life and superior performance, while reducing maintenance costs and operating hazards. Legacy Platinum's valve-regulated construction and gas-recombinant technology eliminate the watering, corrosion cleanup, lead exposure, and leakage associated with traditional flooded batteries. All of this combines to make Legacy Platinum the perfect match of superb power and hassle-free operation.

## POWERFUL DESIGN

- Valve-Regulated Cell Construction – Eliminates the need for watering. Prevents spillage and corrosion.
- Absorbed Glass Mat (AGM) Technology – Provides more capacity per cube. Allows opportunity charging.
- Burned-On Intercell Connector – Eliminates loose connections caused by vibrations. Never requires retorquing.
- Lead/Calcium/Tin Alloy – Created for longer shelf life and longer service life.
- Unique Compression Plate\* – Maintains separator compression within the cell, prolonging cycle life.

\*Patent Pending

## A CLEANER, SAFER SYSTEM

The Legacy Platinum System is designed to be not only easier to use and maintain, but cleaner and safer as well. Legacy Platinum's valve-regulated construction eliminates user contact with electrolyte, as well as preventing leaking and spilling. The Legacy Platinum requires no dedicated battery room. Recombinant technology, which significantly reduces gassing, allows the Legacy Platinum to be used and recharged virtually anywhere. Constructed of a lead/calcium/tin alloy, the Legacy Platinum is totally recyclable. From design and construction, through total recyclability, the Legacy Platinum makes motive power cleaner and safer.

## A COMPLETE SYSTEM

It doesn't get any easier than this. The Legacy Platinum Walkie Combo, an innovative concept in pallet jack batteries, combines one of the industry's sturdiest maintenance free batteries with a perfectly matched charger for the most efficient technology in a single compact unit.

You get better efficiency day-to-day with the Legacy Platinum Walkie Combo. It's an easy, safe and convenient package that's ideal for light to medium material handling applications.

# ...BACKED BY A LEGACY OF EXCELLENCE

Every Legacy Platinum battery and charger is backed with a comprehensive manufacturer's warranty. Douglas Battery stands behind each warranty with over 75 years of manufacturing and service excellence. Through quality products and unmatched customer service, Douglas Battery is dedicated to giving you more for your motive power dollar.

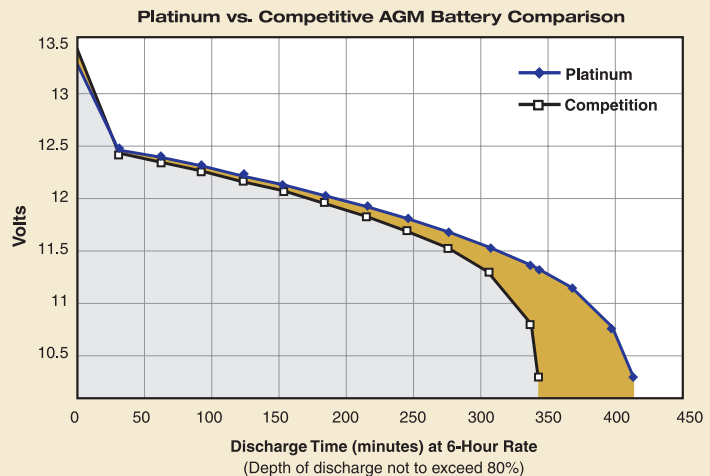

# EASY CHARGING

The Legacy Platinum System offers both a controlled ferro-resonant (CFR) charger and a Silicon Controlled Rectifier (SCR) charger to meet your specific battery charging needs. The Legacy CFR charger features DV/DT termination for precise charge control, a slow start current ramp-up to prevent gassing and programmable charge profiles enabling the Legacy CFR to be used on both Flooded and Sealed systems. The Legacy SCR charger offers a precisely controlled charge profile to ensure full charge and long battery life, automatic restart in case of power failure, and a wide range of programmable features. For the ultimate in flexibility, the Legacy CFR and SCR chargers can be set to charge other manufacturers' batteries. The Legacy Platinum chargers ensure that your Legacy Platinum batteries keep running long and strong.

**Legacy Platinum Batteries are designed to provide the peak performance required by today's motive power applications.**

The Legacy Platinum delivers its rated capacity and then some. Heavy-duty, robust construction, combined with a unique "C wrap" Separator system, dramatically reduces internal shorts. The Legacy Platinum continues the Douglas tradition of integrity, service and value.
