# Minuteman PowerBoss 2632 Automatic Scrubber

## Versatile Performer

The 2632 is available in a 26" or a 32" cleaning path. The 26" model is available in a brush assisted drive or a traction drive. The 32" is available in a standard traction drive platform. It is constructed of a static epoxy coated steel frame and rotationally molded polyethylene tanks. The 2632 is built to last. It is ergonomically designed for operator comfort and ease of use.

## Easy Maneuverability

The Minuteman PowerBoss 2632 scrubbers are designed for operator comfort, safety and efficiency. Both the brush assisted and traction drive models minimize operator fatigue and provide maximum maneuverability.

## Productivity and Performance

Big on productivity, the 2632 features two offset scrubbing brushes, large capacity tanks and will clean up to 34,000 square feet per hour. Whether it is daily maintenance or heavy project work, the 2632 has what it takes to do the job.

## User Friendly Control Panel

There are no confusing switches or buttons, lower the squeegee and the vacuum automatically turns on. Lower the brush deck and the brushes automatically turn on. It's that simple.

## Easy-to-Adjust Rear Squeegee Assembly

The squeegee assembly utilizes a break-away design in case of impact. Removal of the assembly and the blades requires no tools and is quick and simple. The squeegee is self-tracking which leaves the floors dry for immediate safe use. Two caster wheels adjust to provide uniform blade deflection. The pitch of the assembly is also easily adjusted with a turnbuckle system. The front squeegee blade features a slotted and a non-slotted blade for use on different floor types. The rear squeegee blade is four-sided for maximum extended use. The squeegee hose has a P trap that will not allow water to spill back on the floor once the vacuum is turned off.

## Durable Construction

The 2632 is made with a static epoxy coated paint, 11 gauge steel frame that resists corrosion. The tanks are constructed of a heavy-duty rotationally-molded polyethylene. Rugged construction and reliability, a Minuteman hallmark, means that the 2632 scrubber is built to last.

## Easy-to-Use Optional Off-Aisle Wand and Squeegee Tool

Minuteman PowerBoss' patented off-aisle wand is the key to cleaning hard to reach areas and is offered as an option on the 2632.

## Easy Serviceability

The battery compartment and all other components are easily accessible for preventative maintenance and servicing greatly reducing your total cost of ownership. Simply tilt back the solution and recovery tanks for complete access to service the battery compartment and all other moisture protected components.

## Easy Access Battery Compartment

The easy access battery compartment holds four 6 volt 275Ah batteries that provide three hours plus run time on a single charge for maximum productivity. A polyethylene battery tray protects the batteries and machine.

## Offset Edge scrub

The 2632 has an offset deck so you can easily scrub along walls and under racking where most scrubbers miss.

## Easy Access to Brushes

The large front skirt can be easily removed with no tools giving you easy access to the brushes or pad holders. The 2632 utilizes two  $\frac{3}{4}$  hp Permanent Magnet, 250 rpm Motors. The 26 uses two 13" brushes or pad holders and the 32 uses two 16" brushes or pad holders. Cleaning solution is center fed to the brushes ensuring even cleaning patterns.

# Minuteman PowerBoss 2632 Automatic Scrubber

## OUTSTANDING STANDARD FEATURES:

- Large solution / recovery tanks for maximum productivity.
- The batteries are located in a self-draining protective tray to provide extra safety.
- Large protective skirts are easy to remove for quick access to brushes.
- Offset scrub heads provide maximum efficiency.
- Variable solution flow with automatic solenoid water shut-off.
- Disc brushes are center-fed to keep water & chemical contained with more contact time.
- Easy rear caster wheel adjustment insures proper squeegee setting.
- Key switch power lock-out insures authorized personnel use only.
- Easy to read battery gauge.
- Large 23 gallon solution and recovery tanks.
- Simplified, user friendly, control panel.
- Built-in molded water shut-off prevents premature vacuum motor failure.
- All internal electrical components incorporate moisture protection barriers that insure longterm liability and provide lower maintenance costs.

Specifications	26"	32"
Scrub Path	26" (66 cm) Brush Head is offset to the right for cleaning next to walls.	32" (81 cm) Brush Head is offset to the right for cleaning next to walls.
Squeegee Width	38" (97 cm) Curved	38" (97 cm) Curved
Coverage Performance	28,000 ft <sup>2</sup> /hr (2,601 m <sup>2</sup> /hr)	33,500 ft <sup>2</sup> /hr (3,112 m <sup>2</sup> /hr)
Scrub	Two 13" (33 cm) Disc Brushes	Two 16" (40.5 cm) Disc Brushes
Brush Motor & RPM	Two ¾ hp Permanent Magnet, 250 rpm Motors	Two ¾ hp Permanent Magnet, 250 rpm Motors
Brush Pressure	120 – 220 lbs	120 – 220 lbs
Solution Tank	23 gal (87 L)	23 gal (87 L)
Recovery Tank	23 gal (87 L)	23 gal (87 L)
Tank Construction	Rotationally Molded Polyethylene	Rotationally Molded Polyethylene
Dimensions	54" x 30" x 31" (137cm x 76cm x 104cm)	54" x 30" x 31" (137cm x 76cm x 104cm)
Drive System	Brush Driven or ½ hp Transaxle	½ hp Transaxle
Vacuum	3 stage, 24 V, 1 hp Vac Motor	3 stage, 24 V, 1 hp Vac Motor
Off-Aisle Kit Pump	100 psi (optional)	100 psi (optional)
Wheels	Front – 10" (25 cm) Solid Rubber Tires	Front – 10" (25 cm) Solid Rubber Tires
